READY TO RIDE

The safety of our passengers has always been our top priority. As customers need to charter motorcoaches again, Arrow Stage Lines is ready. We have updated our cleaning programs to keep people confident they can travel with us anytime, every time. We call it our “Ready to Ride” program.

DISINFECTING

Today, we are all focused on more frequent disinfection and the same is true for preparing our motorcoaches with intensive cleaning and disinfecting before and after each trip. This includes focusing on specific cleaning methods for handrails used for entering and exiting the vehicle, arm rests, driver steering wheel, dash area, head rests, window sills, restroom door handles and hand rails, and baggage door handles.

DECONTAMINATION SYSTEMS

In addition to intensive cleaning and disinfecting before your trip, Arrow Stage Lines has also invested in Curis portable decontamination systems. The EPA Registered CURIS Decontamination System provides a No-Touch, Whole-Room, Whole-Vehicle delivery system of 7% Hydrogen Peroxide Fog which kills 99.9999% of germs.

We have implemented an accelerated schedule for use of the Curis system in our motorcoaches. This system will be used every 120 days in every motorcoach, or sooner, if a passenger or driver is seen to have flu like symptoms while on charter. In that situation, the vehicle will be processed upon its return to an Arrow Stage Lines facility. We have Curis decontamination systems in each of our primary locations. These units are mobile and can be set up and used in any vehicle, anywhere and at any time.

PPE & DISINFECTING

Our motorcoach operators have been provided masks, gloves, and cleaning items to reduce the risk of exposure and spread. All commonly touched surfaces used in our motorcoach will be cleaned and disinfected during the trip and at the end of the day; common surfaces include but are not limited to: passenger tray tables, passenger grab handles, tops of all seats, entrance handrails, arm rests, all restroom surfaces, doors, and handles, passenger lights and air controls, and window ledges.

SANITIZER

Arrow Stage Lines has also installed hand sanitizer dispensers at the entrance and lavatory areas of the motorcoach. We strongly encourage passengers to remember to sanitize their hands.
